AUTOMATE YOUR EVERYDAY

NFL SCHEDULE RELEASE SIMPLIFIED

We know how stressful it can be when the NFL schedule is released. The race instantly begins to get all of your barcodes/posting tokens loaded into your Point of Sale.

We are here to help. For free!

PRIOR TO SCHEDULE **RELEASE**

1. **Create a free Seat Scouts account.**
Already have one, [login](#)
2. **Add your Ticketmaster and Seatgeek Season Ticket accounts.**

That's it for now. We will email you when your files are ready for download.

DOWNLOAD **POSTING TOKENS**

Shortly after tickets get released to your Season Ticket Account, you should see a "Download" button next to that account in Seat Scouts. Download your posting tokens necessary to list tickets on any NFL integrated marketplace.

Send your CSV's to your auto-processor and they should be able to attach the posting tokens to your listings in your Point of Sale.

As a reminder, new this NFL season are secure mobile tickets that feature a rotating barcode that updates regularly. Screenshots of QR codes or barcodes will not be valid for entry.

Skybox User? If you currently use Skybox Point of Sale, we can add the Posting Tokens directly to your listings. All you need to do is add your Skybox API credentials, and we will take care of the rest!
